

The Pebble

wi-fi controller

Control your heat pump or air conditioner from anywhere with your smartphone

With The Pebble Wi-Fi Controller, you can remotely control your heat pump or air conditioner (HVAC) from your smartphone.

You can turn it on or off, change mode, change temperature, adjust the fan speed, set up schedule timers, it's right at your finger tips – from anywhere any time. The Pebble is suitable for residential homes, apartments, holiday homes, offices, school and commercial spaces.

Android and iOS smartphones can download the free Pebble Air app from Google Play or the App Store. Being cloud based, Pebble Air can keep The Pebble updated at all times. We can easily add cool stuff we currently have under development, new heat pumps and air conditioner models as they're released and much more.

Available in Stone (White) and Titanium (Black)
